Honors: IB certificate in Mathematics, Biology, Chemistry, and English, 8-time honour roll recipient

EXPERIENCE

Princeton Economics Department, Princeton, NJ

June 2018 – August 2018, June 2019 – August 2019

Research, Monetary Policy and Financial Investments

- Worked under the guidance of former vice chairman of the federal reserve Alan Blinder and macroeconomist Nobuhiro Kiyotaki
- Conducted publishable research explaining the effect of the fed's quantitative easing program on income inequality in the United States during and after the recent financial crisis (2018)
- Expanded upon in 2019, by inclusion of 5 other major countries, and additionally investigated conventional monetary policy's effect on income and wealth inequality in the U.S., Canada, U.K., Japan, and China
- Revealed evidence that the inflated asset prices in financial investments caused by quantitative easing have redistributive properties; increasing the relative share of income of the wealthy
- Gained expertise in analysis, specifically finding causal relations between multiple variables
- Used statistical software STATA to create vector autoregressive and vector error-correction models
- Gained experience with financial market analysis, economic analysis of inflation and GDP, and the redistributive channels of the economy

ADDITIONAL SKILLS

- Programming – Java
- Computer Applications – STATA, Excel, Word, Publisher, PowerPoint, Access
- Website / Video Editing – Adobe Muse, Final Cut Pro, Adobe Premiere Pro, Avid Studio
